

Executive Summary

This dashboard analyzes product sales performance using quantity sold and purchase frequency across 394 products. The analysis identifies top-performing products, category contribution, and customer purchase patterns.

Key Insights

1. Top Products by Quantity

La Sien Premium Water 75CL recorded the highest quantity sold (6.8K units). Puffpuff and Family Bread are also among the strongest-selling products. Bakery and beverage products dominate overall sales volume.

2. Top Products by Frequency

Family Bread was purchased most frequently (3,839 times). Water products appear repeatedly among top-performing items, showing strong customer demand. Essential everyday products generate more repeat purchases.

3. Frequency vs Quantity Analysis

Family Bread and La Sien Premium Water 75CL are high-frequency, high-volume products, making them star products. Some products have high quantities but lower purchase frequency, indicating bulk purchases. Products in the lower-left quadrant show weak performance and may require promotion or review.

4. Category Performance

- Others category contributes approximately 47% of total quantity sold.
- Beverages contribute about 20%.
- Snacks contribute about 15%.
- Bakery contributes about 10%.
- Meals and Desserts contribute the lowest share of sales volume.

Recommendations

- Maintain adequate stock levels for Family Bread and La Sien Premium Water products.
- Increase marketing efforts for low-performing products.
- Review products with low frequency and low quantity for possible replacement or promotional campaigns.
- Expand high-performing beverage and bakery product lines.
